* Collective Investment Scheme

OBJECTIVE

To obtain a long-term return on capital. Management is active, that is, the management team adjusts the composition of the investment portfolio with the aim of maximizing profitability and trying to exceed the stock market.

Management uses the performance of the STOXX Europe 600 Net Return index as benchmark and is used only for comparative purposes.

Investments in equity assets could be in total without predetermination to market capitalization, sectors, stock markets or countries.

Up to 10% of the assets could be invested in other financial Collective Investment Schemes (CISs), belonging or not to the asset manager group.

The remainder is exposed to deposits and money market instruments that trade in the market or not of at least medium credit quality.

Exposure to foreign exchange risk may reach 100% of total exposure.

APPLICABLE FEES

Management (annual)	1,40%	AUMs
Depository (annual)	0,07%	AUMs

PRODUCT GOVERNANCE
